Schedule 1

Support Policy

This Support Policy sets out the service levels for the Services ("Service Levels" or "SLA") and is subject to and made a part of the main agreement. It may be modified from time to time at the sole discretion of SmarterPay on written notice to the Customer.

1. Definitions

1.1. These definitions apply in this Support Policy:

Severity Level: means a metric used to classify and prioritise incidents impacting the services provided under the SLA. The following severity levels shall apply:

Critical: refers to an incident where the customer has experienced a total loss of service that affects a business-critical process or multiple users within a business-critical application.

Important: refers to an incident where the customer has experienced an incomplete loss of service or where incidents affect multiple users but are not business-critical, or where there is a requirement for corrective action with minimal delay.

Normal: refers to an incident where the customer has experienced a limited loss of service, or where the incident affects one or a small percentage of users, or where the incident is not business-critical but causes inconvenience, or where the incident does not require immediate corrective action.

Low: refers to an incident where the customer has experienced limited inconvenience or where the customer would like to make a service request that does not require immediate action.

Knowledge Base: is a website dedicated to displaying information such as policies, guides and frequently asked questions to customers relating to SmarterPay's products and Services, currently this can be found here: <https://wiki.smarterpay.com/>.

Support Consultancy: refers to software upgrades, server moves, help with back-ups and restores, administration, configuration services and remote diagnostic services.

Project Consultancy: refers to 3 or more consecutive consultancy days required to deliver a common objective.

Service Failure Diagnostics: refers to Investigation of service failure. Consultancy is limited to internal bug fixes. Where integration fails caused by external system or process change then consultancy charges may apply.
